

Blooming Flowers!

LOOK WHO'S BLOOMING NOW!

Students will love creating their own flower garden on the class bulletin board.

Have each student cut a long stem and two leaves from green construction paper. Ask each child to write his or her name on the stem.

Display these on the board with a catchy title.

As each child completes a required assignment, add a paper flower to the top of the stem. Glue a muffin paper to the inside of the flower for a three dimensional effect.
