

# Desktop Calendar

Have each of your students make his or her own desktop calendar with these patterns.

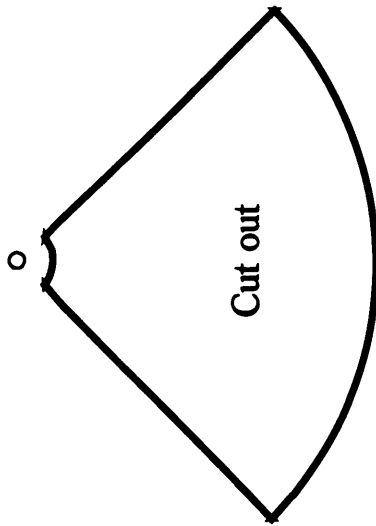

Color and cut out each pattern piece. Cut out the three indicated windows. Fold along the dotted line and attach the wheels inside the calendar using brass fasteners.

Each morning, students turn the wheels to the appropriate month and day. As the seasons change have them move the season wheel.

This desktop calendar makes a great parent gift, as well!

**SEASON**

**MONTH**

**MY**

\_\_\_\_\_ Year

**CALENDAR**

**DAY**

\_\_\_\_\_  
Student's Name

You may want to enlarge each of the Desktop Calendar Patterns and use them on a bulletin board as a classroom calendar. Assign students to change the wheels daily.
