

Dog Sled Team Patterns

Use these patterns in a variety of ways.

1. Give each student their own sled and driver. Let them collect dogs to race across the class bulletin board.

2. Enlarge the patterns and label the sled with your name and room number. Copy and cut one dog pattern for each student in the class. Label them with the students' names. Display the entire dog sled team down one wall to welcome newcomers to your class.

(Cut the patterns from heavy paper or enlarge them for bulletin board displays.)

3. Write math problems in the sled patterns and the answers on the dog patterns. Students match the dogs to the appropriate sled after solving the math problems.
