

## Be Safe on the Street

Copy, laminate and cut out the bicycle pictures below. Create a bulletin board with black craft paper on the bottom and green paper on the top. Enlarge the pictures and display them on the board. Copy, cut out and laminate the "safe" and "not safe" symbols. Talk about bike/road safety and safety equipment. Have each child take a turn picking either a safe or not safe symbol. The child then picks a picture that depicts the symbol that was selected and talks about the picture. Ask them to explain why it shows a child being safe or not safe. The symbol is then taped next to the picture. Keep the display up for a few days so that the children can explore it during "work" or playtime.
